Profile

Hi, I'm Rajnish Rajan, a final-year BCA student at DSEU University passionate about technology, problem-solving, and creating impactful solutions. Through hands-on projects in structural analysis, surveying, and design, I've built strong technical skills and a sharp eye for detail. I'm driven, curious, and eager to bring fresh ideas and dedication to real-world challenges, contributing value from day one.

Projects

AI Chatbot (HTML, CSS, JS)

"Developed an interactive AI chatbot using HTML, CSS, and JavaScript, designed to provide real-time responses and enhance user engagement through a simple and intuitive interface.

Coaching Website

"Built a fully functional coaching website, including user registration, course management, and payment integration, optimizing the user experience and streamlining administrative tasks."

### Hotel Management System (Python, Tkinter, Database)

"Developed a comprehensive hotel management system using Python and Tkinter, integrated with a database to perform tasks such as user registration, sign-in, room allotment, stay duration and amount calculation, and other essential hotel operations, all within an intuitive GUI."
